Work Experience

On Target Web Solutions, Orlando, FL   09/2017 – Currently Employed
Web Production Assistant.
Responsibilities:

- Customize Word Press themes to match existing designs.
- Modify existing code as needed.
- Assist the Production lead with the design and complete build out of websites in Word Press.
- Preform updates on live websites.
- Create and Edit content/graphics using Adobe Photoshop.
- Create training guides for clients.

Reggae Rise Up, Orlando, FL   05/2016 - 01/2017
Head and Team Lead for Reggae Rise Up Street Team in promotions for Orlando Florida.
Responsibilities:

- I collected and distributed all the promotion material to my street teamers as well as answered any of their questions regarding promotions in Orlando. I kept track of the teamers progress numbers and locations using a google documents

spread sheet. I then collaborated with other cities in Florida to lock in final promotion numbers.

Personal Project

Blue Tail Brew

A fully functioning Ecommerce website made with Word Press.

- Blue Tail Brew is an online store that sells whole bean coffee. It was made with a **mobile first web development strategy**.
- Blue Tail Brew used **Profile Builder plugin** and **Woo Commerce plugin** so that the user could easily log in and purchase the coffee they desired.
- I completely customized the **Responsive Mobile theme** to fit the needs and design of Blue Tail Brew.

Art or Vandalism.

• Art or Vandalism is an interactive website that teaches you the history of graffiti. Users can scroll through pictures and learn about graffiti as a culture and art form.

•**OnePage.js** was used to create a unique experience for the user, easily dividing the sections on the website. I also used **Animate.css** and **Textillate.js** to create smooth animations and transitions of the page keeping the user focused on the website.

• I developed the website using **HTML5, CSS3, jQuery, OnePage.js** framework, **Animate.css library**, **and Textillate.js** library.
